

In the Claims:

1. (Previously presented) A process for the preparation of solid phase bonded 2-chlorotriptyl chloride (2-CTC resin) of formula I

wherein Ps is a polymeric support and n has the following meaning: $1 \geq n > 0$
comprising the reaction of solid phase bonded 2-chlorotriptyl of formula II

wherein R is OH or/and OC_{1-4} -alkyl or/and $NR'R''$

wherein R' and R'' independently of each other represent C_{1-4} -alkyl, or R' and R'' together with the nitrogen to which they are bonded represent a 5 to 8 membered heterocyclic radical

in the presence of HCl and dioxane.

2. (Canceled)

3. (Canceled)

4. (Canceled)

5. (Original) The process according to claims 1 wherein n is $0.9 \geq n \geq 0.5$.

6. (Original) The process according to claim 1 wherein the reaction temperature is between 0 and 110°C.
7. (Previously presented) The process according to claim 1 wherein the HCl content in dioxane is > 0 to about 40 g/100 ml.
8. (Original) The process according to claim 1 wherein the reaction time is 6-96 h.
9. (Original) The process according to claim 1 wherein it is carried out in a single percolation or in repetitive percolations.
